

HOW ONE TENNIS TEAM'S SHADE BECAME ANOTHER TEAM'S SOLUTION.

BULLARD TENNIS
BULLARD, TX

KIT-BASED
SHADE SYSTEM

5-ROW
STANDARD OPTION

1 WEEK
ORDER TO INSTALL

THE CHALLENGE

Texas tennis means playing in the heat. Between outdoor matches, Bullard's athletes needed relief from direct sun, while coaches and spectators also needed a more comfortable place off the court. The team had already seen a possible answer: FLX Shade installed over the bleachers at a rival tennis facility in nearby Tyler.

THE SOLUTION & RESULT

Bullard chose FLX Shade's kit-based system, designed around universal bleacher sizes with a standard option for five-row bleachers. Preconfigured materials eliminated the need for a fully custom design and allowed the system to be picked, packed and shipped quickly. From order to installation took one week, giving players a shaded place to recover in time for the hot spring season.

They saw FLX Shade at a rival school. Then they wanted their own.
